

Bowen and Parkinson's -A Testimonial

June 20 2007

Of my 56 years, the last 20 have been impaired by a disease named Parkinson's by the neurologists. My body was suffering. I could not bear being looked by others. I could no longer love this flesh enveloping me. You dared to touch delicately this sick body. You dared tackle a disease said incurable.

The deepest victory is my reconciliation with my physical body. The results are there, very important and visible to the naked eye. Here are a few of them:

- After the first treatment, the burning pain in my feet, which wouldn't let me sleep, has completely vanished.
- After the second treatment, my walking was so much better I could go back shopping in stores. This looks childish, but imagine what the deprivation of this entertainment means to a woman.
- After the third and fourth sessions I completely controlled my bladder (what a misery to have to go to the washroom every 2 hours).
- Fifth session, the unhoped-for happens, I was able to return home by walking and taking the trolley: I have not been able to do this since the beginning of my pathology.

Thank you, for touching me with compassion, gentleness and, obviously, love for human beings.

Annie Ganbois

July 10 2007

I want to add that all day I haven't had any manifestation of my pathology. What a relief to pursue activities without being bridled in each movement. I am living again. This morning work was a pure marvel. Thank you for supporting me on this luminous path. See you next week.

Sincerely,

Annie
